

3042-W

(Lamb-touch feel modifier dilutable in water)

• Properties

1. Composition : Non silicon type transparency wax & special synthetic oils.
2. Appearance : Transparent yellowish liquid.
3. Active substances : $96\pm 1\%$ approx.
4. Ionic charge : Non ionic
5. Specific gravity : 0.83

• Application

This product confers a moisten and very natural feel to the leather.

3042-W is used as feel modifier for water base

In the latter case, such mixtures should be prepared when required, because they are not stable enough for storage.

Use in amounts of 6~10% according to the weight of water.

• Storage

- Keep them away from any source of heat or naked flame in well ventilated rooms between -5°C and $+30^{\circ}\text{C}$.
- Before using must churn during at 5~10minute.

• **Package** : 100kg PVC Drum
