

933-GLW

(Greasy waxy-touch feel modifier dilutable in water)

• Properties

1. Composition : Mineral synthetic lecithin & special synthetic oils.
2. Appearance : Opacity brown- yellowish liquid.
3. Active substances : 93~94% approx.
4. Ionic charge : Anionic
5. Specific gravity : 0.94

• Application

This product confers a greasy and wet feel grip to the leather.

933-GLW is used as feel modifier for water.

In the latter case, such mixtures should be prepared when required, because they are not stable enough for storage.

Use in amounts of 40~50% according to the weight of water.

• Storage

1. Keep them away from any source of heat or naked flame in well ventilated rooms between +15°C and +35°C.
2. Before using must churn during at 5~10minute.

• **Package** : 100kg PVC Drum.
